

100%

100% sustainable raw materials

By 2040, we will only be processing sustainable raw materials.

100%

100% renewable energy

By 2040, we will only be working with renewable energy.

100%

100% Recycling

By 2040, we will only be working with closed ecological cycles.

Year 2040

The way to a sustainable future

Migros-Industrie's commitment to sustainability covers the entire value chain from crop-growing and processing to consumption and recycling. The Vision 2040 guides Migros-Industrie's commitment to sustainability. Based on its sustainability strategy, Migros-Industrie sets ecological, economic and social targets. The first stage, comprising the period from 2015 to 2020, has already been completed. Migros-Industrie is pursuing further challenging objectives up to 2025 in the following areas:

- closed loop/recycling
- energy and climate
- products
- packaging
- raw materials and procurement
- responsible employer
- sustainability management

Migros-Industrie is certified in compliance with ISO 14001 throughout its business. We also require suppliers to have an environmental management system in place.

66% renewable energy, for example electricity from hydropower, heat from wood-fired heating plants

100% of the raw materials meet minimum sustainability requirements in line with our raw material strategies.

Goals 2025

100% of packaging is recyclable.

35% women in management positions.

5% less food waste, 32% less incinerated waste – heading towards 100% recycling.

Sales of sustainable products continue to grow.

Goals 2020
achieved ✓

✓ 95% sustainable milk (organic, IP-Suisse standard, sustainable Migros milk).

✓ Best practice examples set in applying Swiss animal welfare standards for imported meat.

CO₂-emissions reduced by around 25% since 2015. ✓

More than 520 apprenticeships. ✓

Over 200 new part-time positions in qualified roles. ✓
